

1st ANNUAL STRATEGIC NORTHERN INFRASTRUCTURE SYMPOSIUM

October 14th and 15th 2009
The Explorer Hotel, Yellowknife, NWT

Welcome!

The Northern Strategy Group is a northern consultancy to kick-start a dialogue among industry and political leadership around the future economic potential of our North. We believe industry and government need to make strategic investments in infrastructure that help open up new economic opportunities, extend the life of current developments, and ultimately create jobs and benefits for the north and Canada.

Investments in pipelines, roads, ports, hydro electricity, communications, marine technology, innovative rural and remote technology solutions - are necessary for us to induce meaningful growth in the coming years. To do this, we need to create a vision that helps us move from discussions about our vast potential into the identification and advancement of strategic investment priorities.

Join us on October 14/15th in Yellowknife, NWT at the 1st Annual Strategic Northern Infrastructure Symposium. Hosted by Northern Strategy Group Conference in cooperation with the Yellowknife Chamber of Commerce.

Conference Highlights include:

Co-Chairs:

Brendan Bell, Former NWT Minister Responsible for Energy and Mining
